

Tim Wienk

Curriculum Vitae

WORK EXPERIENCE

JULY 2016 – PRESENT

BlueBear Internet Solutions, Hengelo

Technical lead

Responsible for all technical aspects within the company, including the technical direction and vision of the developed systems and the company as a whole, as well as management and leading the technical project teams.

AUGUST 2009 – PRESENT

MooTools

Developer

Collaborative development and maintenance of the *MooTools Core* and *MooTools More* JavaScript libraries and smaller MooTools projects, deployment of new versions of the libraries, server administration and maintenance and community support. Lately reduced to only maintenance and server administration.

FEBRUARY 2009 – PRESENT

BlueBear Internet Solutions, Hengelo

Systems administrator

Maintenance, monitoring, installation and responsible for automated backups and failover of the office network, office servers and collocated servers. Collocated servers are Debian based KVM hosts, running multiple virtual Debian systems in a redundant setup.

APRIL 2008 – PRESENT

BlueBear Internet Solutions, Hengelo

Software developer

Concepting, technical design, development and maintenance of the "Liquid" web software platform, able to serve multiple websites and web applications from one installation. The platform includes its own ORM, routing system and MVC/PAC-like structure. Examples of modules include CMS, CRM, webshop and forum modules, as well as more specific modules like a module comprising a permit to work system. Other tasks include leading client projects, maintenance of the older "TIC4" platform and building web front-ends.

JANUARY 2008 – APRIL 2008

BlueBear Internet Solutions, Hengelo

Front-end web developer

My tasks consisted mostly of building HTML/PHP templates, CSS and JavaScript for websites and web applications based on a graphical design. At a lower frequency I worked on the "TIC4" software platform, when changes needed to be made to existing modules or new modules had to be built.
